

SMALL APP, BIG VIRUS

COVID-19 DECISION SUPPORT

OUR IDEA

An agile, electronic, clinical decision support system integrating the quality use of COVID-19 therapeutics with streamlined documentation and reporting workflows.

SEE OUR IDEA
IN ACTION

THE OUTCOMES

Over 800 patients have had their care improved, with the added benefit of saving 4 reams of paper forms.

Ninety percent of patients received optimal therapy through routine use of the system. Potentially harmful adverse drug events were prevented in the remaining 10% of patients via post submission pharmacist review.
